SKILLS

Languages

C, C++, Core Java, Python, SQL

Web

HTML5, MySQL

Technologies/Frameworks

MERN stack, Numpy pandas, Matplotlib

Developer Tools

VS Code, GitHub

Core Subjects

Algorithms, DBMS, Operating Systems, OOPs.

CERTIFICATES

Certified AI Driven Professional

Certified Agentic AI and Automation

Certified AI Powered Development & Testing

- Prompt to code Development
- AI - Based Testing
- Workflow Automation

SQL Using AI

Python Programming: AI - Powered Implementation

★ LANGUAGES

English

Hindi

Marathi

SUMMARY

Curious, creative, and results-driven Software Developer with hands-on experience in Python, Java, SQL, and full-stack web development. I specialize in transforming ideas into functional, user-centered applications that solve real-world challenges and create meaningful impact. I thrive in dynamic, fast-paced environments where collaboration fuels innovation and continuous learning drives excellence. Committed to refining my technical expertise and problem-solving abilities—**constantly learning, constantly building, constantly improving.**

EDUCATION

B.Tech in Computer Science and Engineering

Nagarjuna Institute of Engineering Technology and Management Nagpur,

Nagpur, Maharashtra

PROJECTS

Chemical Components Analysis

Developed a Python-based data analysis project to analyze chemical compound properties and identify meaningful patterns and relationships. Performed data cleaning, missing-value analysis, outlier detection, correlation analysis, and visualization using Pandas, NumPy, and Matplotlib, generating insights from a dataset of chemical compounds.

School Management System

Developed a Python-based application to manage student records, fees, attendance, marks, users, authentication, and reports. Implemented database-driven CRUD operations and modular functionality to improve data management, reduce manual processes, and provide efficient access to school information.

Weather App

Developed a Python-based GUI application that retrieves real-time weather data using a weather API and displays temperature, weather conditions, and other details. Implemented API integration, JSON data processing, exception handling, and Tkinter-based user interface for an interactive and user-friendly experience.

HOBBY

Reading Books

Listening Music
